

Thermography of Wisconsin

Patient Information Sheet

Full Body or Region of Interest Health Screening with Digital Infrared Thermal Imaging
(Thermography)

Purpose of the test:

- Determine the cause of pain.
- Evaluate sensory nerve irritation or significant soft-tissue injury.
- To divine a previously diagnosed injury or condition.
- To identify an abnormal area for further diagnostic testing
- For early detection of lesions.
- To monitor progress of healing and rehabilitation
- To provide objective evidence.

Patient Preparation:

- Do not have physical therapy or electromyography or use a tanning booth on the same day as your thermography appointment.
- Do not have acupuncture treatment, chiropractic or deep tissue massage within 3 days of appointment
- Activity—Do not smoke for 2 hours before the test, do not use lotions, powders or liniments on the day of the test.
- If your hair falls below your neck you should wear it clipped or pinned up.
- Do not shave on the day of the test.
- Avoid sun exposure on the day of the test.
- Attire—Loose fitting clothes and no jewelry.
- No changes necessary for diet or medication

General Information:

- Procedure is: non-invasive, no-contact, no radiation and FDA approved
- Disrobing—remove all clothing and jewelry. Put on a gown or sarong that is supplied. Inform your thermographer if you had an recent skin lesions on your body; the inflammation can cause a false positive result.
- Thermography is performed by a certified clinical thermographer.
- There are no risks or side affects
- Average time for the procedure is 15-20 minutes for one region or 45 minutes for full body.

Please bring the name and address of your healthcare provider so we can send him/her a copy of your report.

You are welcome to bring a companion or partner to be present during the scan
